# Exercises in Electrical and Magnetic Measurement

Filesize: 2.58 MB

Reviews

A must buy book if you need to adding benefit. It is actually rally fascinating throgh studying time. Your way of life span will likely be transform as soon as you complete looking over this publication. (Ms. Bernice Rolfson)

EXERCISES IN ELECTRICAL AND MAGNETIC MEASUREMENT

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 Excerpt: . flowing through his body? Answer. 100 milliamperes. (21.) The resistance of a Thomson s mirror galvanometer is sometimes as great as 50,000 ohms, and such an instrument will give a deflection of 200 divisions of the scale with a single Daniell s cell through aline resistance of 10 megohms. Assuming the electromotive force of a Daniell cell to be 1 volt, what would be the strength of current flowing through the galvanometer? Answer. 10so of a milliampere. (22.) The same current was sent simultaneously through two tangent galvanometers A and B, producing in them the deflections 28 20 and 21 respectively. If on another occasion a current of a certain strength produce a deflection of 37 in the galvanometer A, what deflection would the same current have produced in B? When a tangent galvanometer is inserted in a circuit with the plane of its coil coinciding with that of the magnetic meridian, a current of strength, c, will produce a deflection, 0, the two being connected by the equation c = m tan 0, where mis a constant whose numerical value depends upon the construction of the particular instrument and upon the intensity of the local magnetic field. Let mx and m2 be the values of the constant m for the two galvanometers A and B; then from the first experiment we have mx tan 28 20 = m2 tan 21. mi tan 21, - m2 tan 28 20 Let x = the number of...
