

Zoology in Wisconsin High Schools

By Henry Veere Lacy

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: .anatomical resemblances between allied animals. Reinforce that by similarities in embryos.

Paleontological evidence may also be used. But more than this is not profitable. The following types may be profitably studied in order to bring out the idea as stated above. In this case, as in the preceding, and as also in the succeeding points, the types are not given in the order in which they should be studied-(a) Paramecium and its allies, amoeba and vorticella. (b) Hydra and its allies, including the hydroid colony, and coral. The fresh water sponge may also be introduced here, (c) The earth worm and its allies, -the leech and flatworms. (d) The insects, including the grasshopper, cricket and locust; the butterfly with the moth; the house fly with the horse fly and mosquito. (e) The snail with its allies, -the sing and the fresh water olam. (f)...

Reviews

I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.

-- Merritt Kilback II

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
