Comprehensive guide! Its this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

In modern medicine there is no specific cure for such fearful disease as infectious hepatitis and liver cirrhosis. Treatment of many liver diseases is symptomatic and often disappointing since much is still obscure about their etiology. There is, however, a plethora of drugs in the indigenous system of medicine said to be useful in these disease. Costus speciosus (Zingiberaceae) commonly known as Keukand or Kustha in Hindi, used in Ayurvedic system of medicine as an anti-inflammatory, anthelmintic, astringent, bitter, depurative, purgative and as stimulant. The plant is also used as anti-diabetic. An experimental investigation was carried out to explore the use of this drug as a hepatoprotective agent. The extract registered a significant fall in the levels of SGOT, SGPT, ALKP, SBLN and liver inflammation thus exhibited a significant hepatoprotective activity. 64 pp. Englisch.
