Not illustrated. 1920 Excerpt: . profits as used in this discussion means the net profits of the accountant or, in other words, the net sum left over at the end of the fiscal year after all funds set aside for all purposes that may be considered as debits have been deducted. It is clear from this definition that the amount to be shared, if any exists, represents the difference between outlay and returns. Expenses for operation, including wages and interest on capital, must have prior claim over profits. Since it is the responsibility of management in an industrial enterprise to secure net profits, the failure to realize them should be the loss of management. There is, therefore, a direct relation between the risks of enterprise and profits. It is for this reason that profits are sometimes defined as the wages of management. In so far as this theory is accepted, there is no economic basis for sharing profits with workmen. Profits are inseparably connected with risk. They depend on many factors besides the efficient services of workers, chief among them being the proper type of management and organization. Many firms are not able to realize any profits at all. These may be called marginal enterprises. Those above the margin hold their position and make their profits because of favorable conditions, including exceptional management and organization. Whoever takes the risk of an enterprise, therefore, whether investor, organizer, or manager, is inevitably responsible for the losses and is the only one...
