

Electronics technology and training (vocational Eleventh Five-year professional planning electronic information materials)

By WANG CHENG AN // BI XIU MEI

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 196 Publisher: Machinery Industry Pub. Date :2011-01-28 version 1. The book production process in accordance with requirements of modern electronic products in the order written. including electronic components. testing. electronic materials selection. before assembly of electronic products preparation. electronic components. soldering. printed circuit board production. installation of electronic products. electronic products. debugging. surface mount electronic components. electronic products. testing and packaging. and all the production process. each chapter are arranged with the appropriate training session . In order to improve management and electronic skills. but also increased the reading of electronic documents and electronic technology products integrated training process two chapters. Book in the selection of advanced and practical. detailing the actual production of modern electronic products. steps can be used as vocational schools and the application of electronic technology. electronic information professional materials. production processes engaged in the operation of electronic and technical personnel have some reference value. Contents: Preface Introduction Chapter 1 1.1 electronic components of the testing process of identification and detection resistor resistor type 1.1.1 -1.1.2 The main parameters of resistor potentiometer 1.1.4...

Reviews

A top quality publication along with the font used was intriguing to read. I really could comprehend everything using this written e book. Its been designed in an remarkably straightforward way and it is only after i finished reading through this publication by which basically altered me, modify the way i believe.
